July 8, 2010

Dr. Yehuda Bock, Director  
California Spatial Reference Center  
Scripps Institution of Oceanography, IGPP  
University of California, San Diego  
9500 Gilman Drive, La Jolla CA 92093-0225

Dear Dr. Yehuda Bock:

The California Land Surveyors Association (CLSA) was founded in 1966 to advance the interests of the Land Surveying profession, to maintain the highest possible standards of professional ethics and practice, to encourage uniformity of practices and procedures, and to foster public faith in and an understanding of Land Surveyors and their work.

CLSA, via this letter, is expressing our support of the California Spatial Reference Center, (CSRC) in the Center's work to provide a modern state-wide geodetic control network and to help establish and maintain the legal spatial reference system for California. CSRC provides essential data, information, and tools that benefit geodetic professionals, Engineers, and Land Surveyors in California.

CLSA appreciates the vision and leadership of the CSRC and your expertise in advancing spatial referencing and geodesy for the benefit of Land Surveyors, both public and private sectors, and for the benefit of California businesses, public organizations, and residents.

Should you require additional CLSA support, please feel free to contact us at (707) 578-6016.

Sincerely,

A handwritten signature in cursive script, appearing to read "Aaron R. Smith".

Aaron Smith, PLS
